AVERAGE DAILY FLOW	0.884 MG	0.795 MG
PRECIPITATION	2.02 in	1.3 in
NPDES VIOLATIONS	0	1
PERCENT FLOW CAPACITY	40%	39%

ADDITIONAL COMMENTS:

- Only one proposal was received for the Quail Run Ph II force main and was opened Thursday, August 7<sup>th</sup>. The proposal is from TPI, a local utility and directional drilling company that the Town has had good past experience working with. The proposal submitted by TPI is \$142,000.00 and is for the section of new force main running from the northwest corner of the existing Quail Run apartments proceeding east and then south to be connected to the force main being installed by Buckingham as part of their project. This Town's funds being used on this project is to be reimbursed to the Town via the Hampshires development as part of an agreement back in 2006.
- Only one bid was received on August 14<sup>th</sup> for the re-scoped 2014 Sewer Rehabilitation Project and was from a repeat bidder, SLB Pipeline Solutions, LLC, for the amount of \$173,090.00. SLB's references have been checked and though no having significant experience in pipe bursting or municipal contracts, our Town Engineer believes them to be a responsive and responsible bidder. A Notice of Award has been issued to the company.
